DATA CENTRES

TECHNICAL EXPERTISE AND EXPERIENCE

Lionweld Kennedy is the UK's leading supplier of gratings, handrail systems, platforms, stair treads and ladders.

Our technical expertise and experience in Data Centre construction means we are fully equipped to understand the needs of contractors and specifiers.

We offer full design, installation and project management, as well as fabrication or supply only. The sooner you engage with us, the better we can support you in choosing the best access solutions.

FULL INSTALLATION SERVICE

For large-scale projects or main contractors, you can hand over the grated flooring, stair treads and handrails to us, completely.

Our specialist team will take the headache away and will design, project manage and install.

We'll create solutions that fit alongside your structural requirements, at the right time to the right specification.

PROJECTS AND FABRICATION

We'll support your requirements for technical specification, design, and fabrication. We can install or supply readymade sections, whether you need walkways, platforms, steppers, stair treads or handrails.

No matter how intricate, small or large, we'll create precision pieces, ready-made for you to fit into and around your structure, at the exact time you need them.

SUPPLY ONLY

For stockists and fabricators, we supply standard steel parts, quickly and in volumes to suit you. Cut to size, galvanised or plain.

We can guide you on stocking British and European Standard products and give technical guidance on what you should be supplying to your clients, based on their requirements.

Let us help you choose the best access solutions

STEEL PRODUCTS

OPEN MESH GRATING

The number one choice for steel grating and open mesh flooring is Safegrid. It is used extensively in the design and manufacture of raised platforms, mezzanine flooring and steel walkways in many construction applications, including Data Centres.

SOLID TOP MESH GRATINGS

A closed steel flooring system comprising of an open bar grating with a durbar plate welded to the top surface. This provides a greater load bearing capacity and weight to strength ratio when compared to open bar grating, making it a cost effective solution.

HANDRAILING

Saferail can be provided as a fully fabricated system or in standard modular shapes to allow simple handrail systems to be pieced together with the support of tubular or solid bar handrail stanchions.

LADDERS

Lionweld Kennedy are able to fabricate cat ladders up to 6m high to form a connection between platforms. The ladders can be supplied with a hooped cage and a step over to form a smooth transition to the walking platform.

CLIPS & FASTENERS

Frictional fixing clips are the most common method for fixing open grid flooring. Lionweld Kennedy can provide a variety of frictional or positive fixing clips to secure your grating into place. Specifications often require that flooring panels are joined together to reduce deflection between adjacent panels. Panel joining clips or joining pads can be used to ensure trip hazards are avoided.

OVER
100
YEARS
TRADING

100 YEARS AND COUNTING

We serve multiple industries and every tier of the construction process. We can design, manufacture, fabricate and install.

Lionweld Kennedy has been part of the built environment for over 100 years and the products are as relevant today as ever.

Our focus now is on supplying standardised products which exceed the

British and European Standard as well as bringing efficiencies in the use of raw material and production processes.

Our technical expertise means we are perfectly placed to advise specifiers and contractors on every aspect of grated flooring, stair treads and handrails.

We provide access solutions that are safe and sustainable.
